## OX BOX Helps Protect Valuable Medical Examination Tables during Storage and Shipping

### Problem:

A leading Midwest manufacturer needed a cost efficient protective packaging system for shipping valuable medical examination tables to locations nationwide. Stacking strength was also important because warehousing space was limited.

### Solution:

For cost efficient protection and superior stacking strength, manufacturer chose OX BOX. Combined with custom wood pallet, the OX BOX is inexpensive compared to wood crates or packaging with foam inserts. And, OX BOX allows stacking up to four high of products weighing 500 pounds and more.

### Benefits:

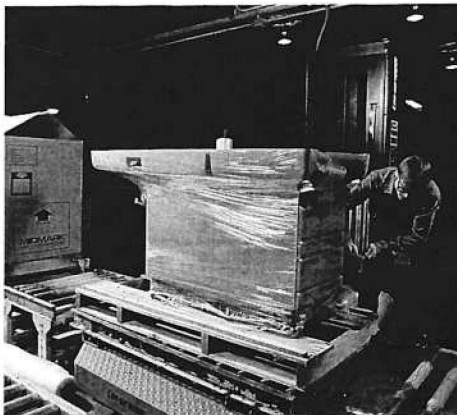

- More cost efficient than wood crates or packaging with foam inserts.
- Superior stacking strength.
- Fast and easy set-up requires only one person.
- OX BOX store flat, reducing storage problems.
- OX BOX Pak is a recyclable resource.

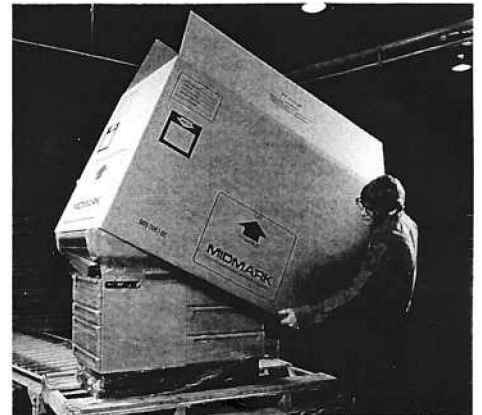

*These packaged products, weighing 500 pounds and more, can be stacked up to four high.*
